To whom it may concern:

I met Jerry Eller (USA Interiors) over two years ago and employed his services to install decorative covers for the air conditioners on the back of my hotel. As I got to know him and became aware of his abilities, I allowed him to do more around the hotel. He painted the back of the hotel and then proceeded to do repairs in the restaurant. At first the repairs were minor, but during this time the restaurant experienced a severe rodent problem. Every time Jerry would repair a hole in the walls or ceilings the rodents would chew through another wall. The problem was so severe that I decided to renovate the entire restaurant and Jerry Eller provided all construction services. He has asked me not to divulge what he did to make the walls and ceilings impregnable to rodents. He says it is a trade secret. His services consisted of the following: Plumbing, Electrical, FRP installation (fiberglass re-enforced paneling), Sheet Rock, Stainless steel fabrication, repair and installation, extensive concrete repair, extensive foundation repair, drainage repair (of which caused the foundation to collapse, and should have been fixed by the contractor that did the original addition).

- Built a partition between the two hotel rooms overlooking the Chattahoochee river above the restaurant
- Installed indoor/outdoor carpet
- Installed new doors
- Tile installation
- Built a new addition on the back of the restaurant
- Installed new gas lines, for hot water heater
- Painting in the restaurant
- Installed a new waitress station
- Built and installed Formica counters partitions and shelves
- Roof repairs
- Structural steel installation to support dining area over river (of which was not done properly originally)
- Remove and rebuild entire floor system inside restaurant (of which was not done right by the original contractor)
- Repair and install an extensive amount of sheetrock
- Plumbing and Electrical
- Rubber cove base installation

Through the whole construction procedure, Jerry Eller was able to keep my restaurant fully operational by installing a partition wall between the dining area and the construction area up until he had to start on the other side of the dining room. He had over ten men working on the project so he could expedite the whole procedure, and get the dining area back in full operation in a shortest amount of time as possible. The largest part of this construction operation took place at night. Being over two years after the fact, I can say truthfully that none of his work has failed or needed repairs, and we have not had a rodent problem since. After it was all said and done Jerry Eller gave me back over \$10,000.00 dollars worth of labor rebates. I am thinking about adding a second floor on the eight unit hotel on the river this winter. If I do so, who do you think I'm going to call? In leaving I would like to add that if it hadn't been for Jerry Eller (USA Interiors), the Health Dept. would have shut my restaurant down, but now I enjoy a high Health Dept. rating and am able to give the public the finest in quinine and services in the Helen Georgia area. I would like to invite anyone that reads this letter to come and see his work and enjoy the finest in eating quinine in the Helen Georgia area.

To Whom It May Concern:

We met Jerry Eller (USA Interiors) after moving to Georgia from Texas. He was one of the contractors that put in bids on the work we needed done before moving in. Believe it or not he was bidding on the drywall repairs at the time, but after talking to him we found that he was talented in more than just drywall. After deep consideration we decided that it would be easier to deal with one contractor than a multitude. The more he done, the more we became comfortable with him. Before it was all over with he ended up doing the complete job. All of which consisted of the following:

1. Repaired all damaged drywall.
2. Installing 6" recessed lighting with dimmers in the vaulted ceiling in the living room.
3. Installing 4" recessed lighting with dimmers in the bedroom.
4. Painted and installed two beautiful sconces in the living room.
5. Changing all receptacles and switches from ivory color to white.
6. Painting the entire house inside (upstairs and down).
7. Installing a new dryer line to the wash room.
8. Removed and replaced a very large deck of which was so ugly and weather beaten and not up to code, with a beautiful deck. Also, poured a new concrete pad at the end of the stairs.
9. Cleaned all of the carpets.
10. Cleaned and sanitized all air conditioning system and ducts in the house, and put in new filters.
11. Oh, I almost forgot that he replaced a badly water damaged French door in the basement and saved us about \$300.00.
12. And last but not least, carpet installation.

We have used Jerry off and on for the past year and he has given us excellent service. He went beyond the call of duty and stood behind all of his work. About a month or so ago when we had those torrential rains, we noticed that water was coming in through the French doors of which he replaced the frame/casing in the basement. We called him to see what he would do about this. Being over a year since the original work, he came out with no questions asked and removed the French doors in order to replace the threshold, re-installed a new threshold and only charged us for the cost of the new threshold, no labor at all of which consisted of three men including himself. Can you think of a company that would do that, over a year past the original work? I like guarantees like that. We would highly recommend him to anyone.

To Whom It May Concern:

Dear Sir or Madam:

I have utilized Jerry Eller's (the owner of USA Interiors) construction services for over 25 years and I can say without any reservation whatsoever that he is the best "sheet rock man" I've ever seen. In that regard, I've renovated and Jerry's worked on three of my personal residences in those 25 years. Additionally, Jerry has performed other ancillary construction services for me and upon my homes, for example framing, painting, etc. I have found Jerry to be reasonable as well as responsible, and recommend him for construction services without hesitation. If you have any questions, please contact me.

Sincerely,

G. Watson Bryant, Jr.

To Whom It May Concern:

I have known Jerry Eber for several years. I met him while building several apartment complexes in the Cleveland Georgia area and he provided sheetrock services for me including stippling ceilings. I also worked with him on new cabinet construction. Two of my sons worked for him in the Atlanta area doing service work and repairs of varying nature which include electrical, plumbing, sheetrock, gutter repair, siding repair, deck repair, and painting. His knowledge of the construction trade is quite extensive, and I can tell you that he did not go through this world with blinders on. I also have an extensive knowledge in the construction field and have employed numerous people over the years, and I will say that everything that Jerry Eber has done for me perfect and un-flawed. Being a man of God I can not say that he is the best on this planet, but I will say this, when it comes to sheetrock he is the best until the best gets here.

Lanier Martin, Pastor

To Whom It May Concern:

I have known Jerry Eller for more than fifteen years and he has done work for my company off and on for about the same amount of time. When I got to know him real well, I found that he was capable of doing anything I could come up with in the construction, service and repair trades. Although he has had his own company for more than thirty years he enjoyed working with me, and for me all this time. He is not always available to do work for me but he has always made an effort to help me when needed. His abilities far exceed anyone I have ever used, and have never had a complaint about his workmanship, appearance, courteousness or honesty. When I put him on a job he is always in charge of all labor, in most cases he brought his own crew with him on major jobs. Jerry Eller has done every possible job related to construction and repair over the years that it would be too numerous to mention in this letter from residential to commercial, there is only one thing that comes to mind that he has not done for my company, and that is, A/C and Heating repair. When I call him to do a job all I do is give him the customers name, phone number, address and nature of the job and he takes it from there to completion. He also bids jobs for me, some of which has exceeded \$ 10,000.00 in labor alone, so please don't doubt his abilities. If anyone has any questions regarding Jerry, please feel free to call me.

Repair Damage from Dry-rot, Water or Pests

★★★★★

Work is still in progress and Jerry Eller has done a very nice job for us on what he has completed. I have a ton of things to do on our home, exterior and interior, and plan on using Jerry Eller to do them. My only problem is that I don't wish to pay hourly to ANYONE, I feel this leaves the price up for grabs, I don't like surprises, my personal feelings. I like a contract signed with the amount in black and white. My general feelings regarding Jerry are as answered above.

★★★★★

Buford, GA

Waterproof a Basement or Foundation

★★★★★

We are very satisfied with Jerry's work. Would hire him again and also recommend him for any work around the house. I did not have a chance to get competitive bids on the project so I really cannot rate the budget (cost) aspect of his work. Therefore I give the middle of the road "fair" rating. He is excellent at keeping you informed of plans and progress.
